ABSTRACT OF CBCS REGULATIONS

Elective and Supportive Papers

Each PG programme is having core, elective and supportive courses/papers having credits from 2 to 5 depending on their lecture hours per week. While core paper is exclusively offered in the parent department, the supportive papers are offered only by other departments. The elective paper may be from their parent/other departments as well. All the courses/papers may/may not have practical training as decided by the programme committee.

Duration and Structure of the Programme

i) The minimum and maximum periods for the completion of a programme are given:

Programme	Minimum number of Semester	Maximum number of Semester
Full Time :		
M.A/M.Sc./M.B.A.	4	8
M.C.A.	6	12
Part Time :		
M.A. and M.Sc.	6	10

ii). The minimum number of credits to be earned for the successful completion of the 2 year full time (e.g: M.Sc.) and 3 year full time (e.g.: M.C.A./M.Tech) programmes normally are 90 and 135 respectively, which should include a minimum number of credits 6 from the supportive courses and 12 from the elective courses. At least one elective/supportive course one must be offered in the first three semesters. The remaining 72 credits are allotted to core papers/course offered by the parent departments. This includes theory, practical and project. Normally the project is conducted in the 4th semester. As a special case, 72 credits may also include Field trip or Industrial Visit. The MBA programme which comes under AICTE norms however will have a minimum of 128 credits (3200) for its successful completion. Keeping the diverse input of candidates in MBA, all elective courses are offered only in the III & IV semesters. Thus, core paper alone will be taught in the I and II semesters of MBA.

Semester wise Registration

The student has to register for opted courses/papers with the respective faculty, after due announcement of the prescribed dates and the beginning/commencement of each semester.

On joining the University, each student is assigned to a faculty advisor. The student can register for course(s) which he/she intends to take during a given semester on the basis of the programme for each discipline as given in the course of the study bulletin and as per the advise given by his/her faculty adviser. The faculty adviser is expected to discuss with the student and then decide the nature of the courses for which the students can register during the semester within the framework of the guidelines (Scheme of Examinations).

Procedure for Registration

The registration schedule is announced in advance by the HOD. Students should contact the respective faculty adviser of their department for guidance and registration. The student adviser on the

Success is nothing more than a few simple disciplines, practiced every day

instruction of HOD can suggest possible elective/supportive course(s) for registration by the candidate. In any case, registration must be completed on or before the prescribed last date for registration. Students having outstanding dues to the institute or a hostel, shall not be permitted to register. Late registration may be permitted for certain period only, for valid reason and on payment of a late registration fee prescribed from time to time by CBCS office. However, if a student fails to register during any semester, his/her studentship is liable to be cancelled.

COURSE WISE GRADING OF STUDENTS LETTER GRADES

TECHNOLOGY

DHCP (Dynamic Host Configuration Protocol) is a communication protocol that lets network administrators centrally manage and automate the assignment of Internet Protocol (IP) addresses of the internet centre. Using the internet protocol, each machine can connect to the internet needs unique IP address, which is assigned when an internet connection is created for a specific computer. Without DHCP, the IP address must be entered manually at each computer in an organization and a new IP address must be entered each time when a computer moves to a new location on the network point.

DHCP uses the concept of a “lease” amount of time that a given IP address will be valid for a computer. The lease time can vary depending on how long a user is likely to require the internet connection at a particular location. It is especially useful in education and other environment where users change frequently. Using very short leases, DHCP can dynamically reconfigure network in which there are more computers than there are available IP address. The protocols also supports static addresses for computer that need a permanent IP address such as Web Server.

UTILIZATION
